## STUDENTS' IMPRESSIONS

**Muhammad Satryo Aji Pamungkas**  
Mahasiswa tahap profesi

When I first decided to become a medical student, I thought I would just be an ordinary doctor who provides general health services. It's great that the perspective changed when I entered the Faculty of Medicine at UC.

Studying at the Faculty of Medicine at UC is a lot of fun experience and is also full of useful knowledge to prepare yourself to become a doctor who is also able to solve problems and innovate in the health sector. I am currently carrying out the professional stage at RSUD dr M. Soewandhie, which is an ideal learning place for young doctors. With competent clinical teaching doctors and supporting infrastructure, we are ready to become 'future medical doctors'!
